This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Factors associated with access to rheumatologists for Medicare patients

Gabriela Schmajuk MD MS¹², Chris Tonner MPH³, Jinoos Yazdany MD MPH²

1: Veterans Affairs Medical Center – San Francisco

2: Division of Rheumatology, University of California – San Francisco, San Francisco CA

3: Institute for Health Policy Studies, University of California, San Francisco

Support: This publication was supported by the National Institutes of Health, through K23 AR063770 (GS), and K23 AR060259 (JY). Its contents are solely the responsibility of the authors and do not necessarily represent the official views of the NIH. The authors have no financial disclosures. The authors report no financial or non-financial interests which could create a potential conflict of interest or the appearance of a conflict of interest with regard to the work.

All authors had access to the data and participated in the drafting of the manuscript.

Article type: Clinical research study

Key words: Rheumatology, access to care, distance

Running head: Travel time to rheumatologists in the US

Word count: 3708
