The genetic architecture of a complex trait: resistance to multiple toxins produced by *Bacillus thuringiensis israelensis* in the dengue and yellow fever vector, the mosquito *Aedes aegypti*

Aurélie Bonin, Margot Paris, Hélène Frérot, Erica Bianco, Guillaume Tetreau, Laurence Després

PII: S1567-1348(15)00321-4

DOI: <http://dx.doi.org/10.1016/j.meegid.2015.07.034>

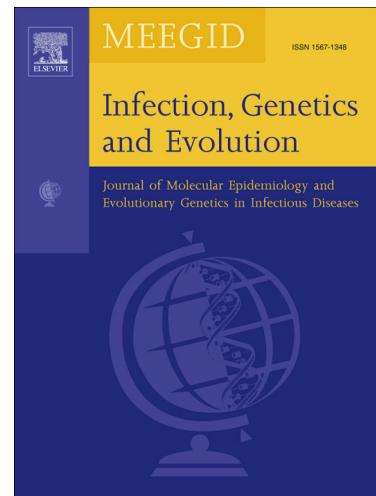

Reference: MEEGID 2428

To appear in: *Infection, Genetics and Evolution*

Received Date: 11 May 2015

Revised Date: 24 July 2015

Accepted Date: 31 July 2015

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
