Segment-specific Ca²⁺ transport by isolated Malpighian tubules of *Drosophila melanogaster*: A comparison of larval and adult stages

Austin Browne, Michael J. O'Donnell

PII: S0022-1910(16)30004-X

DOI: <http://dx.doi.org/10.1016/j.jinsphys.2016.01.005>

Reference: IP 3474

To appear in: *Journal of Insect Physiology*

Received Date: 13 October 2015

Revised Date: 8 January 2016

Accepted Date: 19 January 2016

Please cite this article as: Browne, A., O'Donnell, M.J., Segment-specific Ca²⁺ transport by isolated Malpighian tubules of *Drosophila melanogaster*: A comparison of larval and adult stages, *Journal of Insect Physiology* (2016), doi: <http://dx.doi.org/10.1016/j.jinsphys.2016.01.005>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Segment-specific Ca²⁺ transport by isolated Malpighian tubules of *Drosophila*
melanogaster: A comparison of larval and adult stages
