This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Impact of Adenotonsillectomy On Insulin Resistance And Lipoprotein Profile In Nonobese And Obese Children

Dorit Koren, MD (1,2), David Gozal, MD (1,3), Rakesh Bhattacharjee, MD (1,3), Mona Philby, MD (1,3),
Leila Kheirandish-Gozal, MD, MSc (1)

Sections of Pediatric Sleep Medicine (1), Endocrinology and Metabolism (2), and Pulmonology (3),
Department of Pediatrics, Pritzker School of Medicine, Biological Sciences Division, The University of
Chicago, Chicago, IL, USA

Abbreviated Title: Adenotonsillectomy impact on insulin resistance lipids in children

Key terms: Adenotonsillectomy, insulin resistance, lipids, OSA, children

Word counts:

- Abstract: 247 words
- Text: (excluding refs, tables, abstract): 3325

Number of figures and tables: 5 tables, 1 figure
