This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Bipolar Left Ventricular Pacing is Associated with Significant Reduction in Heart Failure or Death in CRT-D Patients with LBBB

Short Title: Outcome of LV Pacing Polarity in CRT-D Patients

Author Block: Sina Jamé MD*^a, Valentina Kutiyifa MD, PHD, MSc, FHRS*^b, Mehmet K. Aktas MD, FHRS^b, Scott McNitt MS^b, Bronislava Polonsky MS^b, Amin Al-Ahmad MD, FHRS^a, Wojciech Zareba MD, PHD, FHRS^b, Arthur Moss MD, FHRS^b, Paul J. Wang MD, FHRS^a

* These authors contributed equally to the design of the study, data analyses, and manuscript preparation.
