This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Quality of Life after Videoscopic Left Cardiac Sympathetic Denervation in Patients with Potentially Life Threatening Cardiac Channelopathies/Cardiomyopathies

Short title: Quality of Life after LCSD

Ryan M. Antiel, MD<sup>1</sup>, J. Martijn Bos, MD, PhD<sup>2,3,4</sup>, Daniel D. Joyce, BA<sup>5</sup>, Heidi J. Owen, BSN<sup>2</sup>, Penny L. Roskos, RN, CNP<sup>1</sup>, Christopher Moir, MD<sup>1</sup> and Michael J. Ackerman, MD, PhD<sup>2,3,4</sup>.

- 2) Department of Pediatric and Adolescent Medicine, Division of Pediatric Cardiology
- 3) Department of Medicine, Division of Cardiovascular Diseases
- 4) Department of Molecular Pharmacology & Experimental Therapeutics, Windland Smith Rice Sudden Death Genomics Laboratory
- 5) Mayo Medical School

Mayo Clinic, Rochester, MN

Conflicts of Interest: Dr. Ackerman is a consultant for Boston Scientific, Gilead Sciences, Medtronic, St. Jude Medical, and Transgenomic. Intellectual property derived from my research program resulted in license agreements in 2004 between Mayo Clinic Ventures and Genaisance Pharmaceuticals (now Transgenomic) with respect to their FAMILION-LQTS and FAMILION-CPVT genetic tests. The other authors have no conflicts of interest to disclose. None of the disclosures pertain to this paper and none of the companies provided financial support for this paper.

Funding sources: This work was supported by the Mayo Clinic Windland Smith Rice Comprehensive Sudden Cardiac Death Program (MJA).
