This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Safety of American Heart Association Minimum Recommended Exercise for Desmosomal Mutation Carriers

Short title: Safe exercise for at-risk *PKP2* mutation carriers

Abhishek C. Sawant, MD, MPH, Anneline S.J.M. te Riele, MD, Crystal Tichnell, MGC, Brittney Murray, MS, Aditya Bhonsale, MD, Harikrishna Tandri, MD, Daniel P. Judge, MD, Hugh Calkins, MD, FHRS, Cynthia A. James, ScM, PhD

Department of Medicine, Division of Cardiology, Johns Hopkins University, Baltimore, MD, USA

Address for correspondence: Cynthia A. James, PhD, Johns Hopkins ARVD Program - Blalock 545, 600 N. Wolfe Street, Baltimore, Maryland, USA 21287. Phone: 443-287-5985, Fax: 410-502-9148, Email: cjames7@jhmi.edu

Sources of funding: The authors wish to acknowledge funding from the Dr. Francis P.

Chiaromonte Private Foundation and St. Jude Medical Inc. The Johns Hopkins ARVD/C Program is supported by the Leyla Erkan Family Fund for ARVD Research, the Dr. Satish, Rupal, and Robin Shah ARVD Fund at Johns Hopkins, the Bogle Foundation, the Healing Hearts Foundation, the Campanella family, the Patrick J. Harrison Family, the Peter French Memorial Foundation, and the Wilmerding Endowments. This work was performed during Dr. Te Riele's tenure as the Mark Josephson and Hein Wellens Research Fellow of the Heart Rhythm Society.

Disclosures: Dr. Calkins receives research support from St. Jude Medical Inc. and Dr. James receives salary support from this grant. Dr. Calkins is a consultant for Medtronic Inc. and St. Jude Medical. The other authors report no conflict of interest.
