Title: Midline dural filum of the sellar floor: its relationship to the septum attachment to the sellar floor and the ossification in the sphenoid sinus

Author: Yasuhiko Hayashi Daisuke Kita Masayuki Iwato
Issei Fukui Yasuo Sasagawa Masahiro Oishi Osamu
Tachibana Mitsutoshi Nakada

PII: S0303-8467(16)30178-0
DOI: <http://dx.doi.org/doi:10.1016/j.clineuro.2016.05.007>
Reference: CLINEU 4408

To appear in: *Clinical Neurology and Neurosurgery*

Received date: 31-1-2016
Revised date: 27-4-2016
Accepted date: 3-5-2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlight

1. A midline dural filum on the sella is a useful landmark of transsphenoidal approach.
2. The dural filum significantly co-exists with a midline septum in the sphenoid sinus.
3. The dural filum also co-exists with ossification in the sphenoid sinus remarkably.
4. Tethering of sellar dura is suggested as a developmental mechanism of the filum.
