Chemogenetic silencing of the midline and intralaminar thalamus blocks amygdala-kindled seizures

Evan Wicker, Patrick A. Forcelli

PII: S0014-4886(16)30202-3
DOI: doi: [10.1016/j.expneurol.2016.07.003](https://doi.org/10.1016/j.expneurol.2016.07.003)
Reference: YEXNR 12354

To appear in: *Experimental Neurology*

Received date: 27 November 2015
Revised date: 3 July 2016
Accepted date: 8 July 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Title: Chemogenetic silencing of the midline and intralaminar thalamus blocks amygdala-kindled seizures

Author Names: Evan Wicker and Patrick A. Forcelli

Institutional Affiliations: Department of Pharmacology & Physiology, Georgetown University School of Medicine

Corresponding Author:
