Use of human stem cells in Huntington disease modeling and translational research

Monika M. Golas, Bjoern Sander

PII: S0014-4886(16)30020-6
DOI: doi: [10.1016/j.expneurol.2016.01.021](https://doi.org/10.1016/j.expneurol.2016.01.021)
Reference: YEXNR 12204

To appear in: *Experimental Neurology*

Received date: 5 October 2015
Revised date: 22 January 2016
Accepted date: 25 January 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Running title: Use of stem cells in Huntington disease

**Use of human stem cells in Huntington disease
modeling and translational research**
