This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

***Toxoplasma gondii* seropositivity is negatively associated with
Multiple Sclerosis**

- A case- control study-

Frauke Stascheit, Friedemann Paul, Lutz Harms, Berit Rosche

Keywords: Multiple sclerosis, case- control studies, parasitic infections, hygiene hypothesis,
Toxoplasma gondii
