

Accepted Manuscript

Stepwise acquirement of hallmark neuropathology in FUS-ALS iPSC models depends on mutation type and neuronal aging

Julia Japtok, Xenia Lojewksi, Marcel Naumann, Moritz Klingenstein, Peter Reinhardt, Jared Sternecker, Stefan Putz, Maria Demestre, Tobias M. Boeckers, Albert C. Ludolph, Stefan Liebau, Alexander Storch, Andreas Hermann

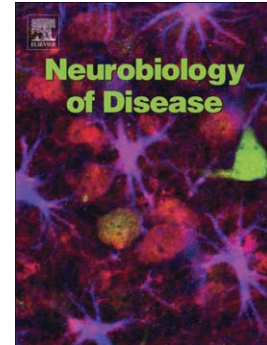

PII: S0969-9961(15)30021-8
DOI: doi: [10.1016/j.nbd.2015.07.017](https://doi.org/10.1016/j.nbd.2015.07.017)
Reference: YNBDI 3566

To appear in: *Neurobiology of Disease*

Received date: 5 May 2015
Revised date: 25 July 2015
Accepted date: 31 July 2015

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

for resubmission to Neurobiology of Disease (NBD-15-398)
