Complex sensorimotor transformation processes required for response selection are facilitated by the striatum

Ann-Kathrin Stock, Vanessa Ness, Christian Beste

PII: S1053-8119(15)00748-X
DOI: doi: [10.1016/j.neuroimage.2015.08.036](https://doi.org/10.1016/j.neuroimage.2015.08.036)
Reference: YNIMG 12517

To appear in: *NeuroImage*

Received date: 3 December 2014
Accepted date: 15 August 2015

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Complex sensorimotor transformation processes required for response selection are facilitated by the striatum
