This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Title:** Key Preoperative Clinical Factors Predicting Outcome in Surgically Treated Patients with Metastatic Epidural Spinal Cord Compression: Results from a Survey of 438 AOSpine International Members

**Authors**

Nater A, MD<sup>1</sup>  
Tetreault L, PhD<sup>2</sup>  
Davis AM, PhD<sup>3</sup>  
Sahgal A, MD<sup>4</sup>  
Kulkarni AV, MD, PhD<sup>1,5</sup>  
Fehlings MG, MD, PhD<sup>1,2 \*</sup>

**Affiliations**

- (1) Department of Surgery, Division of Neurosurgery, University of Toronto, Toronto, Ontario, Canada
- (2) Division of Neurosurgery, Toronto Western Hospital, Toronto, Ontario, Canada.
- (3) Division of Health Care and Outcomes Research, Krembil Research Institute, University Health Network; Institute of Health Policy, Management and Evaluation, Departments of Physical Therapy and Rehabilitation Science Institute, University of Toronto, Toronto, Ontario, Canada.
- (4) Department of Radiation Oncology, Sunnybrook Odette Cancer Centre, Toronto, Canada
- (5) Division of Neurosurgery, Hospital for Sick Children, University of Toronto, Toronto, Ontario, Canada

michael.fehlings@uhn.ca

**Key words:** Metastatic epidural spinal cord compression, Outcomes, Predictive factors, Quality of life, Surgery, Survival, Survey

**Abbreviations list**

ASIA	American Spinal Injury Association
BMI	Body Mass Index
CI	Confidence interval
ECOG	Eastern Co-operative Oncology Group
EQ-5D	EuroQol 5 dimensions
CPR	Clinical Prediction Rules
HRQoL	Health-related Quality of Life
MESCC	Metastatic Epidural Spinal Cord Compression
NOMS	Neurologic, Oncologic, Mechanical, and Systemic
OSRI	Oswestry Spinal Risk Index
SINS	Spinal Instability Neoplastic Score

**Level of evidence:** 5 (based on Oxford Centre for Evidence-Based Medicine)
