Cell cycle phase-specific drug resistance as an escape mechanism of melanoma cells

Kimberley A. Beaumont, David S. Hill, Sheena M. Daignault, Goldie Y.L. Lui, Danae M. Sharp, Brian Gabrielli, Wolfgang Weninger, Nikolas K. Haass

PII: S0022-202X(16)30862-4

DOI: [10.1016/j.jid.2016.02.805](https://doi.org/10.1016/j.jid.2016.02.805)

Reference: JID 241

To appear in: *The Journal of Investigative Dermatology*

Received Date: 29 October 2015

Revised Date: 6 February 2016

Accepted Date: 25 February 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Cell cycle phase-specific drug resistance as an escape mechanism of melanoma cells
