Long-term Effects of Octreotide on Liver Volume in Patients With Polycystic Kidney and Liver Disease

Antonio Pisani, Massimo Sabbatini, Massimo Imbriaco, Eleonora Riccio, Nadia Rubis, Anna Prinster, Annalisa Perna, Raffaele Liuzzi, Letizia Spinelli, Michele Santangelo, Giuseppe Remuzzi, Piero Ruggenti, ALADIN Study Group

PII: S1542-3565(16)00109-9  
DOI: [10.1016/j.cgh.2015.12.049](https://doi.org/10.1016/j.cgh.2015.12.049)  
Reference: YJCGH 54624

To appear in: *Clinical Gastroenterology and Hepatology*  
Accepted Date: 17 December 2015

## AUTHOR CONTRIBUTIONS

Antonio Pisani and Massimo Sabbatini had the original idea and wrote the PLD study protocol; Piero Ruggenenti and Giuseppe Remuzzi designed the ALADIN trial and revised the PLD study protocol; Antonio Pisani, Eleonora Riccio, Letizia Spinelli and Michele Santantangelo identified, treated and monitored study participants and contributed to data recording; Massimo Imbriaco acquired all the liver Magnetic Resonance Images; Anna Prinster designed the MRI acquisition protocol, monitored the MRI quality, and set up and performed image processing and renal volume quantification centrally; Antonio Pisani and Massimo Sabbatini wrote the first draft and Piero Ruggenenti and Giuseppe Remuzzi the final version of the manuscript: all of them contributed to data analyses and interpretation; Raffaele Liuzzi and Annalisa Perna performed the statistical analyses; Nadia Rubis monitored the study. All the Authors had direct access to original data, and critically revised and approved the final manuscript. The corresponding authors had final responsibility for the decision to submit for publication. No medical writer was involved in the creation of the manuscript.
