Identification of a Variety of Mutations in Cancer Predisposition Genes in Patients with Suspected Lynch Syndrome

Matthew B. Yurgelun, Brian Allen, Rajesh R. Kaldate, Karla R. Bowles, Thaddeus Judkins, Praveen Kaushik, Benjamin B. Roa, Richard J. Wenstrup, Anne-Renee Hartman, Sapna Syngal

PII: S0016-5085(15)00678-2
DOI: [10.1053/j.gastro.2015.05.006](https://doi.org/10.1053/j.gastro.2015.05.006)
Reference: YGAST 59777

To appear in: *Gastroenterology*
Accepted Date: 9 May 2015

Please cite this article as: Yurgelun MB, Allen B, Kaldate RR, Bowles KR, Judkins T, Kaushik P, Roa BB, Wenstrup RJ, Hartman A-R, Syngal S, Identification of a Variety of Mutations in Cancer Predisposition Genes in Patients with Suspected Lynch Syndrome, *Gastroenterology* (2015), doi: 10.1053/j.gastro.2015.05.006.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

All studies published in *Gastroenterology* are embargoed until 3PM ET of the day they are published as corrected proofs on-line. Studies cannot be publicized as accepted manuscripts or uncorrected proofs.

Title: Identification of a Variety of Mutations in Cancer Predisposition Genes in Patients with Suspected Lynch Syndrome

Word count (including abstract, manuscript body, figure legends, table legends, and references): 5539

Total number of tables: 4

Total number of figures: 2

Acknowledgements, disclosures, and conflicts of interest: Author MBY reports receiving research funding from Myriad Genetic Laboratories, Inc. for other ongoing projects. Author SS does not receive research funding from Myriad, however, she is MBY's mentor and collaborator on the projects that will be supported by the research grant. Authors BA, RRK, KRB, TJ, PK, BBR, RJW, and ARH are full-time employees of and receive compensation from Myriad Genetic Laboratories, Inc.

Funding support: NIH (National Cancer Institute) K24CA113433 and R01CA132829 (Dr. Syngal).

Role of funding organizations:

The funding organizations had no role in the design and conduct of the study; the collection, analysis, and interpretation of the data; or the preparation, review, or approval of the manuscript.

Employees of Myriad Genetic Laboratories, Inc., served as co-investigators in this study and provided material support, including germline testing and interpretation, as described in the manuscript. The specific co-investigators listed as authors participated in the review and final approval of the submitted manuscript. No grant support was obtained from Myriad Genetic Laboratories, Inc., for the study described in this manuscript.

Author contributions:

Study concept and design: MBY, BA, RRK, ARH, RJW, SS.

Acquisition of data: RRK, KRB, PK, BBR, RJW.

Analysis and interpretation of data: All authors.
