This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

All studies published in Gastroenterology are embargoed until 3PM ET of the day they are published as corrected proofs on-line. Studies cannot be publicized as accepted manuscripts or uncorrected proofs.

ACCEPTED MANUSCRIPT

Association of Coffee Intake with Reduced Incidence of Liver Cancer and Death from Chronic

Liver Disease in the US Multiethnic Cohort

Veronica Wendy Setiawan¹, Lynne R. Wilkens², Shelly C. Lu³, Brenda Y. Hernandez², Loïc Le Marchand², Brian E. Henderson¹

Short title: Coffee, chronic liver disease and liver cancer.

Grant support: National Cancer Institute grants CA164973 and CA186203.

Abbreviations: BMI, body mass index; CI, confidence interval; CLD, chronic liver disease; HCC, hepatocellular carcinoma; RR, relative risk.

Correspondence:

V. Wendy Setiawan, Ph.D.
