Low rate of Large Polyps (>9mm) Within 10 Years After an Adequate Baseline Colonoscopy With no Polyps

David Lieberman, MD Jennifer L. Holub, MPH Cynthia D. Morris, PhD, MPH Judith Logan, MD J. Lucas Williams, MPH Patricia Carney, PhD

PII: S0016-5085(14)00546-0
DOI: [10.1053/j.gastro.2014.04.020](https://doi.org/10.1053/j.gastro.2014.04.020)
Reference: YGAST 59094

To appear in: *Gastroenterology*
Accepted Date: 17 April 2014

Please cite this article as: Lieberman D, Holub JL, Morris CD, Logan J, Williams JL, Carney P, Low rate of Large Polyps (>9mm) Within 10 Years After an Adequate Baseline Colonoscopy With no Polyps, *Gastroenterology* (2014), doi: 10.1053/j.gastro.2014.04.020.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

All studies published in *Gastroenterology* are embargoed until 3PM ET of the day they are published as corrected proofs on-line. Studies cannot be publicized as accepted manuscripts or uncorrected proofs.

Low rate of Large Polyps (>9mm) Within 10 Years After an Adequate Baseline Colonoscopy With no Polyps

Short title: Outcomes after negative baseline colonoscopy
