This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

All studies published in *Gastroenterology* are embargoed until 3PM ET of the day they are published as corrected proofs on-line. Studies cannot be publicized as accepted manuscripts or uncorrected proofs.

**Title: Differences in DNA Methylation Signatures Reveal Multiple Pathways of Progression from Adenoma to Colorectal Cancer**

**Running Title: DNA methylation patterns and colorectal cancer**

**Authors:** Yanxin Luo<sup>1, 2</sup>, Chao-Jen Wong<sup>2</sup>, Andrew M. Kaz<sup>2, 3, 4</sup>, Slavomir Dzieciatkowski<sup>2</sup>, Kelly T. Carter<sup>2</sup>, Shelli M.
