This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Title:

Development and validation of a point-of-care test for detecting hantavirus antibodies in human and rodent samples

Running title:

Hantavirus rapid test

Word counts of the abstract: 136 words

Word counts of the body of the text: 3,485 words (and 5 tables)

Full names of all authors:

Andrea Cristine Koishi^{1*}

Mateus Nóbrega Aoki^{1*}

Taissa Ricciardi Jorge¹

Andréia Akemi Suzukawa¹

Camila Zanluca¹

Silvana Levis²

Claudia Nunes Duarte dos Santos^{1#}
