Title: Effect of caspofungin and micafungin in combination with farnesol against *Candida parapsilosis* biofilms

Author: Renátó Kovács Aliz Bozó Rudolf Gesztelyi Marianna Domán Gábor Kardos Fruzsina Nagy Zoltán Tóth László Majoros

PII: S0924-8579(16)00041-8
DOI: <http://dx.doi.org/doi:10.1016/j.ijantimicag.2016.01.007>
Reference: ANTAGE 4745

To appear in: *International Journal of Antimicrobial Agents*

Received date: 14-7-2015
Revised date: 13-1-2016
Accepted date: 22-1-2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- The interaction of farnesol and echinocandins against *Candida parapsilosis* biofilms was studied.
- FICs, two methods based on Bliss independence, and time–kill experiments were used.
- Farnesol showed synergism with echinocandins against *C. parapsilosis* biofilms.
- Based on time–kill results, caspofungin + farnesol was effective even at 24 h.
