Title: Application of the Immunostained Plaque Assay for Detection and Titration of Rabies Virus Infectivity

Author: Jun-Sun Park Jihye Um Young-Ki Choi Yeong Seon Lee Young Ran Ju Su Yeon Kim

PII: S0166-0934(15)00353-5

DOI: http://dx.doi.org/doi:10.1016/j.jviromet.2015.10.010

Reference: VIRMET 12900

To appear in: Journal of Virological Methods

Received date: 3-9-2015 Revised date: 1-10-2015 Accepted date: 29-10-2015

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

| 23 | Highlights |
| 24 | |
| 25 | • Immune plaque assay was developed for the detection of both street and fixed rabies |
| 26 | viruses. |
| 27 | The plaques yielded clear, countable and distinguishable morphology. |
| 28 | • The growth kinetics showed no significant difference between the immune plaque assay |
| 29 | and FAT. |
| 30 | • These methods produced similar results with the PRNT. |
| 31 | |
| 32 | |
