Title: Rapid detection of duck hepatitis A virus genotype C using reverse transcription loop-mediated isothermal amplification

Author: Chuanfeng Li Zongyan Chen Chunchun Meng Guangqing Liu

PII: S0166-0934(13)00480-1
DOI: <http://dx.doi.org/doi:10.1016/j.jviromet.2013.11.009>
Reference: VIRMET 12374

To appear in: *Journal of Virological Methods*

Received date: 27-5-2013
Revised date: 13-11-2013
Accepted date: 19-11-2013

Please cite this article as: Li, C., Chen, Z., Meng, C., Liu, G., Rapid detection of duck hepatitis A virus genotype C using reverse transcription loop-mediated isothermal amplification, *Journal of Virological Methods* (2013), <http://dx.doi.org/10.1016/j.jviromet.2013.11.009>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- An RT-LAMP assay for detection of DHAV-C was developed and optimized.
- The sensitivity and specificity of RT-LAMP were confirmed and compared to RT-PCR.
- RT-LAMP has the potential usefulness for field and laboratory clinical diagnosis.
