Title: Nucleotide sequence of *Zygosaccharomyces bailii* virus Z: evidence for +1 programmed ribosomal frameshifting and for assignment to family *Amalgaviridae*

Author: Delphine Depierreux Minh Vong Max L. Nibert

PII: S0168-1702(15)30139-8
DOI: <http://dx.doi.org/doi:10.1016/j.virusres.2016.02.008>
Reference: VIRUS 96828

To appear in: *Virus Research*

Received date: 4-12-2015
Revised date: 22-2-2016
Accepted date: 28-2-2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Nucleotide sequence of *Zygosaccharomyces bailii* virus Z:
evidence for +1 programmed ribosomal frameshifting and for
assignment to family *Amalgaviridae***
