Segmental contributions to trunk control in children with moderate-to-severe cerebral palsy

Sandra L. Saavedra, Marjorie H. Woollacott

PII: S0003-9993(15)00092-1

DOI: [10.1016/j.apmr.2015.01.016](https://doi.org/10.1016/j.apmr.2015.01.016)

Reference: YAPMR 56093

To appear in: *ARCHIVES OF PHYSICAL MEDICINE AND REHABILITATION*

Received Date: 26 November 2014

Accepted Date: 7 January 2015

Please cite this article as: Saavedra SL, Woollacott MH, Segmental contributions to trunk control in children with moderate-to-severe cerebral palsy, *ARCHIVES OF PHYSICAL MEDICINE AND REHABILITATION* (2015), doi: 10.1016/j.apmr.2015.01.016.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Running Head: Segmental contributions to trunk control.

Title: Segmental contributions to trunk control in children with moderate-to-severe cerebral palsy.

Authors: Sandra L Saavedra*

Marjorie H Woollacott

Affiliation: Department of Human Physiology and Institute of Neuroscience, University of Oregon,
Eugene, OR, USA.

* New affiliation for Sandra Saavedra; Department of Rehabilitation Sciences, University of Hartford,
West Hartford, CT, USA

Presentation acknowledgement: Preliminary results of these data have been presented as a poster abstract at AACPD 2009, titled “Spinal control in children with cerebral palsy: evidence for specific segmental deficits” and in Sandra Saavedra’s doctoral dissertation “Contribution of spinal segments to control of posture during typical and atypical development” located in scholarsbank.uoregon.edu

Acknowledgements

The authors thank Penelope B. Butler of The Movement Centre, Oswestry UK for inspiring the idea of evaluating segmental contributions to trunk control²⁵ and Dave Childers of the Center for Statistical Consultation and Research (CSCAR), University of Michigan for statistical consultation.
