This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

TITLE PAGE

1. The Effect of Immediate Postpartum Compared to Delayed Postpartum and Interval Etonogestrel Contraceptive Implant Insertion on Removal Rates for Bleeding
2. Authors:
 - a. Luu Doan Ireland MD, MPH (David Geffen School of Medicine at the University of California, Los Angeles)
 - b. Vinita Goyal MD, MPH (The Warren Alpert Medical School of Brown University and Women and Infants Hospital)
 - c. Christina A. Raker ScD (The Warren Alpert Medical School of Brown University and Women and Infants Hospital)
 - d. Anne Murray MD (The Warren Alpert Medical School of Brown University and Women and Infants Hospital)
 - e. Rebecca H. Allen MD, MPH (The Warren Alpert Medical School of Brown University and Women and Infants Hospital)
3. We gratefully acknowledge the financial support provided by the Department of Obstetrics and Gynecology of the Warren Alpert Medical School of Brown University and Women and Infants Hospital
4. No conflicts of interest
5. Clinical trial registration number is not applicable
6. Abstract: 247 words
7. Text: 2006 words
