This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**A selective Serotonin 5-HT<sub>1B</sub> receptor inhibition suppresses cells proliferation and clonogenicity, and induces of apoptosis in human uterine leiomyoma**

**Running title:** 5-HT<sub>1B</sub> receptor inhibition suppresses the proliferation of uterine leiomyoma cells

**\*Nilgun Gurbuz<sup>1</sup>, \*Mehmet Resit Asoglu<sup>1,3</sup>, Ahmed A. Ashour<sup>1</sup>, Salama Salama<sup>2</sup>, Gokhan S. Kilic<sup>3</sup> and Bulent Ozpolat<sup>1</sup>**

**\* First authors:** Nilgun Gurbuz and Mehmet Resit Asoglu (Both authors equally contributed to this manuscript)
