

## Accepted Manuscript

Title: Methanol removal from aqueous mixture with organophilic pervaporation: experiments and modelling

Author: Andras Jozsef Toth Peter Mizsey

PII: S0263-8762(15)00145-8

DOI: <http://dx.doi.org/doi:10.1016/j.cherd.2015.04.031>

Reference: CHERD 1860

To appear in:

Received date: 27-1-2015

Revised date: 18-4-2015

Accepted date: 28-4-2015

Please cite this article as: Toth, A.J., Mizsey, P., Methanol removal from aqueous mixture with organophilic pervaporation: experiments and modelling, *Chemical Engineering Research and Design* (2015), <http://dx.doi.org/10.1016/j.cherd.2015.04.031>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Budapest University of Technology and Economics 1782

## Chemical Engineering Research and Design

Highlights of

*Andras Jozsef Toth, Peter Mizsey: Methanol removal from aqueous mixture with organophilic pervaporation: experiments and modelling*

- Two different pervaporation model are tested on our experimental data.
- The improved novel model results in a better fit to the experimental data.
- Our measured data are compared to similar results of other research works.
