

Instructions for Authors

These instructions for authors, along with information about copyright, can also be found in the journal.

Authors are requested to submit articles online via <http://ees.elsevier.com/thekne>. This is the Elsevier web-based submission and review system. You will find full instructions located on this site in the Tutorial for Authors. Please follow the guidelines to prepare and upload your article. Once the uploading is done, the system automatically creates an electronic pdf which is used for reviewing. All correspondence, including notification of the Editor's decision and request for revisions, will be managed via this system.

Paper submission are not normally accepted unless you are unable to submit electronically. If this is the case please contact the editorial office at knee@elsevier.com for assistance.

Publication condition

A manuscript submitted to this journal can only be published if it (or a similar version) has not been published and will not be simultaneously submitted or published elsewhere. A violation of this condition is considered fraud, and will be addressed by appropriate sanctions. Two manuscripts are considered similar if they concern the same hypothesis, question or goal, using the same methods and/or essentially similar data.

Arthroplasty cohort studies

The 2-year minimum follow-up of at least 100 cases applies to arthroplasty cohort studies, unless reporting a failing implant

Preparation of the Manuscript

1. All publications will be in English. Authors whose 'first' language is not English should arrange for their manuscripts to be written in idiomatic English before submission.
2. A separate title page should include the title, authors' names and affiliations, and a complete address for the corresponding author including telephone, fax numbers and e-mail address.
3. Authors should supply up to five keywords which may be modified or added to by the Editors.
4. A structured abstract using subheadings Background (including the aim of the study) Methods, Results, Conclusions not exceeding 250 words should appear at the beginning of each Article. Non- clinical studies should add a subheading: Clinical relevance. In addition for clinical studies Level of Evidence should be reported.
5. Acknowledgements should be included after the end of the Discussion and just prior to the References.
6. The text should be ready for setting in type and should be **carefully checked** for errors. Scripts should be typed double-spaced on one side of the paper only. Please do not underline anything and leave wide margins. All pages should be paginated and all lines numbered.
7. The journal number style is that numbers greater than nine should be written as numbers e.g. 12 patients, 15 years. Numbers less than 10 should be written as numbers if describing measurements, Figures, Tables, Classifications and Grades, otherwise should be written as words e.g. 2 mins, three patients, six knees, Grade 1. Numbers beginning sentences should always be written as words.
8. All illustrations should accompany the typescript, **but not** be inserted in the text. Refer to photographs, charts, and diagrams as 'figures' and number consecutively in order of appearance in the text. Substantive captions for each figure explaining the major point or points should be typed under the relevant figure.
9. Tables should be presented on separate sheets of paper and labelled consecutively. Captions should accompany the table.

Summary of Overall Arrangement of Manuscripts

You should arrange your contribution in the following order:

1. Title page including the article title, author(s), affiliation(s), keywords and one author identified for correspondence.
2. An abstract outlining the purpose, scope and conclusions of the paper.
3. The text suitably divided under headings. (Frequently Introduction, Material or Patients, Methods, Results, Discussion will prove satisfactory)
4. Acknowledgements.
5. References.
6. Tables with captions (each on a separate sheet).
7. Captions to illustrations (grouped on a separate sheet or sheets).
8. Illustrations, each on a separate sheet containing no text.

Illustrations

Authors are required to provide electronic versions of their illustrations. Information relating to the preferred formats for artwork may be found at <http://www.elsevier.com/wps/find/authors.authors/authorartworkinstructions>.

Please make sure that artwork files are in an acceptable format (TIFF, EPS or MS office files) and with the correct resolution. If together with your accepted article, you submit usable colour figures then Elsevier will ensure, at no additional charge, that these figures will appear in colour on the Web (e.g., ScienceDirect and other sites) regardless of whether or not these illustrations are reproduced in colour in the printed version. For colour reproduction in print, you will receive information regarding the costs from Elsevier after receipt of your accepted article. Please indicate your preference for colour in print or on the Web only. For further information on the preparation of electronic artwork, please see <http://www.elsevier.com/wps/find/authors.authors/authorartworkinstructions>.

References

Indicate references to the literature in the text by superior Arabic numerals which run consecutively through the paper. Where you cite a reference more than once in the text, use the same number each time. References should take the following form:

1. Journal articles (list all authors when six or less; when seven or more, list the first six and add et al.)
Amis AA, Dawkins GPC Functional anatomy of the anterior cruciate ligament. *J Bone Joint Surg [Br]* 1991; 73B: 260–267
2. Books
Insall JN. *Surgery of the Knee*. New York: Churchill Livingstone, 1984
3. Chapter in a book Graf B. Isometric placement of substitutes for the anterior cruciate ligament. In: Jackson DW, Drez D, eds. *The anterior cruciate deficient knee*. St Louis: CV Mosby Co, 1987: 102–13. Please ensure that all references are complete, i.e. that they include, where relevant, author's name, article or book title, volume and issue number, publisher, year and page reference.

What information to include with the manuscript

1. Having read the criteria for submissions, authors should specify in their letter of transmittal whether they are submitting their work as an Original Article, Review Article, Case Report, or Meeting Report.
2. All authors should have made substantial contributions to all of the following: (1) the conception and design of the study, or acquisition of data, or analysis and interpretation of data, (2) drafting the article or revising it critically for important intellectual content, (3) final approval of the version to be submitted. A letter of transmittal should be included stating this. Include a statement, "Each of the authors has read and concurs with the content in the final manuscript."
3. All contributors who do not meet the criteria for authorship as defined above should be listed in an acknowledgements section. Examples of those who might be acknowledged include a person who provided purely technical help, writing assistance, or a department chair who provided only general support. Authors should disclose whether they had any writing assistance and identify the entity that paid for this assistance.
4. All sources of funding should be declared as an acknowledgement at the end of the text. Authors should declare the role of study sponsors, if any, in the study design, in the collection, analysis and interpretation of data; in the writing of the manuscript; and in the decision to submit the manuscript for publication. If the study sponsors had no such involvement, the authors should so state.
5. Only papers not previously published will be accepted; each manuscript must be accompanied by a statement signed by all co-authors that the material within has not been and will not be submitted for publication elsewhere except as an abstract. Emphasis will be placed upon originality of concept and execution.
6. Work on human beings that is submitted to *The Knee* should comply with the principles laid down in the Declaration of Helsinki; Recommendations guiding physicians in biomedical research involving human subjects. Adopted by the 18th World Medical Assembly, Helsinki, Finland, June 1964, amended by the 29th World Medical Assembly, Tokyo, Japan, October 1975, the 35th World Medical Assembly, Venice, Italy, October 1983, and the 41st World Medical Assembly, Hong Kong, September 1989. The manuscript should contain a statement that the work has been approved by the appropriate ethical committees related to the institution(s) in which it was performed and that subjects gave informed consent to the work. Studies involving experiments with animals must state that their care was in accordance with institution guidelines. Patients' and volunteers' names, initials, and hospital numbers should not be used.
7. At the end of the text, under a subheading "Conflict of interest statement" all authors must disclose any financial and personal relationships with other people or organisations that could inappropriately influence (bias) their work. Examples of potential conflicts of interest include employment, consultancies, stock ownership, honoraria, paid expert testimony, patent applications/registrations, and grants or other funding.
8. Authors are encouraged to suggest referees although the choice is left to the Editors. If you do, please supply the postal address and the email address, if known to you.
9. The Editors will not review revised papers unless each point in the original review has been addressed. A cover letter should be provided which answers each and every comment in the original review indicating what specific changes have been made in the revised manuscript or if no changes were made, then the reasons that the authors disagree with the reviewer.

Randomised controlled trials

All randomised controlled trials submitted for publication in *The Knee* should include a completed Consolidated Standards of Reporting Trials (CONSORT) flow chart. Please refer to the CONSORT statement website at <http://www.consort-statement.org> for more information. The Journal has adopted the proposal from the International Committee of Medical Journal Editors (ICMJE) which require, as a condition of consideration for
