Characterization of grey matter atrophy following 6-hydroxydopamine lesion of the nigrostriatal system

Robert Westphal, Akira Sumiyoshi, Camilla Simmons, Michel Mesquita, Tobias C. Wood, Steve C.R. Williams, Anthony C. Vernon, Diana Cash

PII: S0306-4522(16)30361-X

DOI: <http://dx.doi.org/10.1016/j.neuroscience.2016.07.046>

Reference: NSC 17250

To appear in: *Neuroscience*

Accepted Date: 29 July 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

CHARACTERIZATION OF GREY MATTER ATROPHY FOLLOWING 6-HYDROXYDOPAMINE
LESION OF THE NIGROSTRIATAL SYSTEM

Robert Westphal^{a1*}, Akira Sumiyoshi^c, Camilla Simmons^a, Michel Mesquita^a, Tobias C Wood^a, Steve CR Williams^a, Anthony C. Vernon^b, Diana Cash^a

Word count: 7622 (plus 2771 references)

Figures: 5

Tables: 5

Author contributions: RW jointly conceived the study with DC and ACV. RW performed all live imaging experiments, histology and analyses, and wrote the manuscript. AS gave technical support and contributed to the manuscript critique. CS, MM and TCW gave technical support and conceptual advice. SCRW supervised the project. DC and ACV supervised the project, contributed to the interpretation of data and to the manuscript critique.
