This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Systemic treatment with adipose-derived mesenchymal stem cells ameliorates clinical and pathological features in the amyotrophic lateral sclerosis murine model

Silvia Marconi, PhD¹, Marta Bonaconsa, PhD¹, Ilaria Scambi, PhD¹, Giovanna Maddalena Squintani, MD², Wang Rui, MD¹, Ermanna Turano, PhD¹, Daniela Ungaro, MD³, Stefania D'Agostino, PhD¹, Francesca Barbieri, MD¹, Stefano Angiari, PhD⁴, Alessia Farinazzo, PhD¹, Gabriela Constantin, MD⁴, Ubaldo Del Carro, MD³, Bruno Bonetti, MD, PhD¹, Raffaella Mariotti, PhD¹.
