

## Accepted Manuscript

Title: The influence of dental occlusion on the body balance in unstable platform increases after high intensity exercise

Author: Sonia Julià-Sánchez Jesús Álvarez-Herms Hannes Gatterer Martin Burtscher Teresa Pagès Ginés Viscor

PII: S0304-3940(16)30071-4  
DOI: <http://dx.doi.org/doi:10.1016/j.neulet.2016.02.003>  
Reference: NSL 31831

To appear in: *Neuroscience Letters*

Received date: 18-10-2015  
Revised date: 17-1-2016  
Accepted date: 2-2-2016

Please cite this article as: Sonia Juligravea-Sánchez, Jesús Álvarez-Herms, Hannes Gatterer, Martin Burtscher, Teresa Paggravees, Ginés Viscor, The influence of dental occlusion on the body balance in unstable platform increases after high intensity exercise, *Neuroscience Letters* <http://dx.doi.org/10.1016/j.neulet.2016.02.003>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

# The influence of dental occlusion on the body balance in unstable platform increases after high intensity exercise
