Temporal pattern of acoustic imaging noise asymmetrically modulates activation in the auditory cortex

Ruwan D. Ranaweera, Minseok Kwon, Shuowen Hu, Gregory G. Tamer, Jr., Wen-Ming Luh, Thomas M. Talavage

PII: S0378-5955(15)30056-3

DOI: [10.1016/j.heares.2015.09.017](https://doi.org/10.1016/j.heares.2015.09.017)

Reference: HEARES 7026

To appear in: *Hearing Research*

Received Date: 14 July 2015

Revised Date: 25 September 2015

Accepted Date: 26 September 2015

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Temporal pattern of acoustic imaging noise asymmetrically modulates activation in the auditory cortex
