Reducing activity, glucose metabolism and acid tolerance response of *Bacillus cereus* grown at various pH and oxydo-reduction potential levels

Julien Le Lay, Halim Bahloul, Sylvie Sérino, Michel Jobin, Philippe Schmitt

PII: S0740-0020(14)00173-7

DOI: [10.1016/j.fm.2014.07.007](https://doi.org/10.1016/j.fm.2014.07.007)

Reference: YFMIC 2218

To appear in: *Food Microbiology*

Received Date: 7 April 2014

Revised Date: 1 July 2014

Accepted Date: 8 July 2014

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 **Reducing activity, glucose metabolism and acid tolerance response of *Bacillus cereus***  
2 **grown at various pH and oxydo-reduction potential levels**
