

Accepted Manuscript

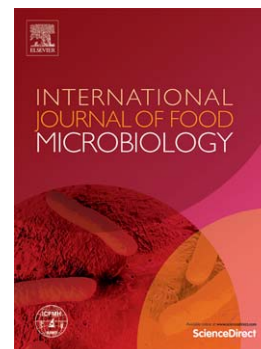

Microbial diversity and metabolite composition of Belgian red-brown acidic ales

Isabel Snauwaert, Sanne P. Roels, Filip Van Nieuwerburg, Anita Van Landschoot, Luc De Vuyst, Peter Vandamme

PII: S0168-1605(15)30189-6
DOI: doi: [10.1016/j.ijfoodmicro.2015.12.009](https://doi.org/10.1016/j.ijfoodmicro.2015.12.009)
Reference: FOOD 7107

To appear in: *International Journal of Food Microbiology*

Received date: 5 March 2015
Revised date: 30 November 2015
Accepted date: 20 December 2015

Please cite this article as: Snauwaert, Isabel, Roels, Sanne P., Van Nieuwerburg, Filip, Van Landschoot, Anita, De Vuyst, Luc, Vandamme, Peter, Microbial diversity and metabolite composition of Belgian red-brown acidic ales, *International Journal of Food Microbiology* (2016), doi: [10.1016/j.ijfoodmicro.2015.12.009](https://doi.org/10.1016/j.ijfoodmicro.2015.12.009)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Microbial diversity and metabolite composition of Belgian red-brown acidic ales

Running title: Microbial ecology of Belgian red-brown acidic ales

Isabel Snauwaert^{1#}, Sanne P. Roels², Filip Van Nieuwerburg³, Anita Van Landschoot⁴, Luc De Vuyst⁵, and Peter Vandamme¹
