

Author's Accepted Manuscript

Hydrogen permeability of PdCuAu membranes prepared from mechanically-alloyed powders

Bruno Honrado Guerreiro, Manuel H. Martin, Lionel Roué, Daniel Guay

PII: S0376-7388(16)30097-7
DOI: <http://dx.doi.org/10.1016/j.memsci.2016.02.040>
Reference: MEMSCI14306

To appear in: *Journal of Membrane Science*

Received date: 18 November 2015
Revised date: 14 February 2016
Accepted date: 19 February 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
