Effect of chamber enclosure time on soil respiration flux: A comparison of linear and non-linear flux calculation methods

Tanka P. Kandel, Poul Erik Lærke, Lars Elsgaard

PII: S1352-2310(16)30495-2

DOI: [10.1016/j.atmosenv.2016.06.062](https://doi.org/10.1016/j.atmosenv.2016.06.062)

Reference: AEA 14712

To appear in: *Atmospheric Environment*

Received Date: 15 February 2016

Revised Date: 9 June 2016

Accepted Date: 23 June 2016

Please cite this article as: Kandel, T.P., Lærke, P.E., Elsgaard, L., Effect of chamber enclosure time on soil respiration flux: A comparison of linear and non-linear flux calculation methods, *Atmospheric Environment* (2016), doi: 10.1016/j.atmosenv.2016.06.062.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1                   **Effect of chamber enclosure time on soil respiration flux:**

2                   **A comparison of linear and non-linear flux calculation methods**
