Evolution and current state of our understanding of the role played in the climate system by land surface processes in semi-arid regions

Sharon E. Nicholson

PII: S0921-8181(15)30004-7
DOI: doi: [10.1016/j.gloplacha.2015.08.010](https://doi.org/10.1016/j.gloplacha.2015.08.010)
Reference: GLOBAL 2314

To appear in: *Global and Planetary Change*

Received date: 19 February 2015
Revised date: 10 June 2015
Accepted date: 11 August 2015

Invited Review Article

Submitted to Global and Planetary Change

Feb 18, 2015

Revised

June 5, 2015

Keywords: land-atmosphere interaction, land surface processes, mineral dust, soil moisture, plant water relationships, semi-arid regions, surface hydrological processes, Sahel, patch dynamics, convection, self-organization, catastrophic shifts
