

Accepted Manuscript

High methylmercury production under ferruginous conditions in sediments impacted by sewage treatment plant discharges

Andrea G. Bravo, Sylvain Bouchet, Stéphane Guédron, David Amouroux, Janusz Dominik, Jakob Zopfi

PII: S0043-1354(15)00276-6

DOI: [10.1016/j.watres.2015.04.039](https://doi.org/10.1016/j.watres.2015.04.039)

Reference: WR 11268

To appear in: *Water Research*

Received Date: 12 November 2014

Revised Date: 29 April 2015

Accepted Date: 30 April 2015

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Sewage Treatment Plant

Dephosphatization with Fe(III)

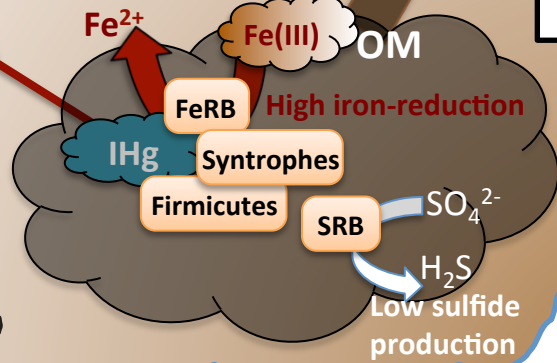

Lake

Discharge containing Fe(III)

Sediment
