Evaluating fluorescence spectroscopy as a tool to characterize cyanobacteria intracellular organic matter upon simulated release and oxidation in natural water

Julie A. Korak, Eric C. Wert, Fernando L. Rosario-Ortiz

PII: S0043-1354(14)00688-5

DOI: [10.1016/j.watres.2014.09.046](https://doi.org/10.1016/j.watres.2014.09.046)

Reference: WR 10909

To appear in: *Water Research*

Received Date: 24 June 2014

Revised Date: 27 September 2014

Accepted Date: 30 September 2014

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
