This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Research Highlights

Cats engage in behaviors that can lead to disease acquisition and transmission
Many diseases found in cats are zoonotic and of concern to human health
Managing cats allowed outdoors is important for reducing incidences of disease
Disease prevalence is likely to increase due to changes in climate and land use
