Biopolymer Nanoparticles as Potential Delivery Systems for Anthocyanins:
Fabrication and Properties

Izlia J. Arroyo-Maya, David Julian McClements

PII: S0963-9969(14)00775-3
DOI: doi: [10.1016/j.foodres.2014.12.005](https://doi.org/10.1016/j.foodres.2014.12.005)
Reference: FRIN 5607

To appear in: *Food Research International*

Received date: 22 October 2014
Accepted date: 6 December 2014

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Biopolymer Nanoparticles as Potential Delivery Systems for Anthocyanins: Fabrication and Properties
