

Accepted Manuscript

Stable Carbon Isotope Fractionation of Six Strongly Fractionating Microorganisms is not Affected by Growth Temperature Under Laboratory Conditions

Jörn Penger, Ralf Conrad, Martin Blaser

PII: S0016-7037(14)00344-5
DOI: <http://dx.doi.org/10.1016/j.gca.2014.05.015>
Reference: GCA 8817

To appear in: *Geochimica et Cosmochimica Acta*

Received Date: 2 October 2013
Accepted Date: 12 May 2014

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

24 May 2014

**Stable Carbon Isotope Fractionation of Six Strongly Fractionating
Microorganisms is not Affected by Growth Temperature Under Laboratory
Conditions**
