	Page
Abstract.	
1. Introduction.	
1.1. The work of Gibbs.	
1.2. The geoscience literature.	
1.3. The work of McLellan.	
1.4. The work of Cahn and others.	
1.5. The work of Rusanov.	
1.6. The work of Slattery and Lagoudas.	
1.7. Approaches based on non-convex energy functions.	
1.8. What this paper is not about.	
1.9. Summary of this paper	
2. Some preliminaries.	
2.1. The driving force for pressure solution.	
2.2. Thermodynamic rules.	
2.2.1. Thermodynamic state variables.	
2.2.2. Equipresence.	
2.2.3. Invariance.	
2.3. Stress and pressure.	
2.4. Deformation.	
2.4.1. The deformation gradient, F .	
2.4.2. Strain measures, C .	
2.5. The chemical potential for a stressed solid.	
2.6. Elasticity.	
2.7. The concept of a phase.	
2.8. Deformation compatibility.	
3. Fluid present mineral reactions.
