Identifying Laurentian and SW Gondwana sources in the Neoproterozoic to Early Paleozoic metasedimentary rocks of the Sierras Pampeanas: Paleogeographic and tectonic implications

Carlos W. Rapela, Sebastian O. Verdecchia, Cesar Casquet, Robert J. Pankhurst, Edgardo G. Baldo, Carmen Galindo, Juan A. Murra, Juan A. Dahlquist, C. Mark Fanning

PII: S1342-937X(15)00057-X

DOI: doi: [10.1016/j.gr.2015.02.010](https://doi.org/10.1016/j.gr.2015.02.010)

Reference: GR 1407

To appear in: *Gondwana Research*

Received date: 18 September 2014

Revised date: 6 February 2015

Accepted date: 12 February 2015

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Keywords:** Southwestern Gondwana assembly, MARA block, Sierras Pampeanas, U–Pb

provenance, Early Cambrian collision

**Abstract**

The provenance of Neoproterozoic to Early Paleozoic sedimentary rocks in the Sierras Pampeanas has been established using U–Pb SHRIMP age determination of detrital zircons in
