Compositions of chromite, associated minerals, and parental magmas of podiform chromite deposits: The role of slab contamination of asthenospheric melts in suprasubduction zone environments

Mei-Fu Zhou, Paul T. Robinson, Ben-Xun Su, Jian-Feng Gao, Jian-Wei Li, Jing-Sui Yang, John Malpas

PII: S1342-937X(14)00002-1
DOI: doi: [10.1016/j.j.gr.2013.12.011](https://doi.org/10.1016/j.j.gr.2013.12.011)
Reference: GR 1197

To appear in: *Gondwana Research*

Received date: 10 August 2013
Revised date: 29 December 2013
Accepted date: 31 December 2013

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Compositions of chromite, associated minerals, and parental magmas of
podiform chromite deposits: the role of slab contamination of asthenospheric
melts in suprasubduction zone environments**
