Structural consequences of cohesion in gravitational instabilities triggered by fluid overpressure: analytical derivation and experimental testing

R. Mourgues, A.C.G. Costa, F.O. Marques, A. Lacoste, A. Hildenbrand

PII: S0191-8141(16)30041-4

DOI: [10.1016/j.jsg.2016.04.008](https://doi.org/10.1016/j.jsg.2016.04.008)

Reference: SG 3335

To appear in: *Journal of Structural Geology*

Received Date: 12 October 2015

Revised Date: 28 March 2016

Accepted Date: 6 April 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Structural consequences of cohesion in gravitational instabilities triggered by fluid overpressure: analytical derivation and experimental testing

Authors: MOURGUES, R.^{1*}, COSTA, A.C.G.^{2,3}, MARQUES, F.O.⁴, LACOSTE, A.⁵,
HILDENBRAND, A.³
