Inversion of pre-orogenic extensional basins in the external Western Alps: Structure, microstructures and restoration

Alexandre Boutoux, Nicolas Bellahsen, Olivier Lacombe, Anne Verlaguet, Frédéric Mouthereau

PII: S0191-8141(13)00235-6

DOI: [10.1016/j.jsg.2013.12.014](https://doi.org/10.1016/j.jsg.2013.12.014)

Reference: SG 3003

To appear in: *Journal of Structural Geology*

Received Date: 31 May 2013

Revised Date: 7 December 2013

Accepted Date: 19 December 2013

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

A new approach for cross section balancing taking into account ductile strain.  
Application to the External Crystalline Massifs in Western Alps.  
New kinematic scenario of cleavage and vein development during basin inversion.  
Cleavage pattern and structural style controlled by pre-orogenic structure.
