Effect of the eccentricity of normal resistivity borehole tools on the current field and resistivity measurement

Attila Galsa, Mátyás Herein, Dezső Drahos, András Herein

PII: S0926-9851(16)30254-3
DOI: doi: [10.1016/j.jappgeo.2016.09.001](https://doi.org/10.1016/j.jappgeo.2016.09.001)
Reference: APPGEO 3061

To appear in: *Journal of Applied Geophysics*

Received date: 9 December 2015
Revised date: 23 August 2016
Accepted date: 2 September 2016

Please cite this article as: Galsa, Attila, Herein, Mátyás, Drahos, Dezső, Herein, András, Effect of the eccentricity of normal resistivity borehole tools on the current field and resistivity measurement, *Journal of Applied Geophysics* (2016), doi: [10.1016/j.jappgeo.2016.09.001](https://doi.org/10.1016/j.jappgeo.2016.09.001)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Effect of the eccentricity of normal resistivity borehole tools on
the current field and resistivity measurement
